Rain Started the in Emarat

In a period, years past because raised temperatures. In many countries' scientists and engineers, be obligate to do natural artificial preses that's fix this big heat issue. These come to existing the field which is name geoengineering, and the purpose of is studying and modulation consistence nature planet earth.

From the most obvious are that they try to reduce CO2 amount in air cover that's make heat DGREM get down. Some countries performed this try in a small field before test in over the country.

The scientists set this way finall solution for reducing heat dgree. And the results aren't clear. We don't know if we made artificial rains, what's going to be good or not. One of their techniques has used for artificial rains cloud seeding technique, that's used for rising rain. This artificial rain is very different from natural rains, the scientists of this field going to do this process not for rising rain, but rather for reduce heat dgree.

Also doing this process is a great number of moneys are estimate. And this process has a good side and also bad side. From some geological scientists the attempt that emirates did maybe bring a lot of damage! Because this artificial rain cause increasing in (Sodium Chlorate, Potassium, and Calcium) level, and this directly damage the environment, but now tests and searches are being done for decrease this process damages.

Artificial Rain in Emarat

In a period, years past because raised global warming. In 10th different countries scientists and engineers, be obligate to do natural artificial process fix this big warming problem. This come to existing the field which is name Geoengineering.

The purpose of this were researching and modulation consistence nature planet Earth. From the most obvious are that when the scientists try to decrease Carbon Dioxide level in air cover to decrease global warming degrees. Some of these countries had performed this attempt in a small space in order, before to do an experiment all over the country.

The scientists have put their last hope to decrease global warming. And the results unknown and we don't know that it would be good or bad. Clouding seeding Is one of the techniques that's that used for increasing rain amount. There are big differences between artificial rain and natural rain. Achieve this process for decrease global warming.

Also achieving this process is a great number of monies are estimate. And technique has a good and bad sides. According some geologist the attempt that emirates did maybe bring a lot of damage! Because this artificial rain cause increasing in (Sodium Chlorate, Potassium, and Calcium) level and it will be causing a lot of damage to the environment directly. But now tests and searches are being done for decrease this process damages.

Assessment

Self-assessment

In my first translation I had some mistake like structure and some mistake in grammar, but after discussion I improved my second translation. It was better than first one.

Peer-assessment: dunya jahwar

First, she did some mistakes I mean she choose some wrong words but in her second text she did great and she used some new words and expressions which is made the text look better than the first text.

Choosing word in first & second tr. first second

Heat issue	Warming problem
amount	level
Heat degree	Global warming
fore	exitance
editing	modification
try	attempt

From tight of the well to the capacity of the paradise.

After 5 days of continuous drilling, Moroccan child Ryan, get off the deep well like a dead body, after he has lost his soul, in one of the news that rattle the whole word. Ryan story started in Tuesday, when he was playing near the well in village that located in shafshawn region in the north of the Moroccan. I was going asr prayer, and when l came back, l didn't see Ryan, and then it turned out that Ryan is in the well, Ryan's father said.

With the passage of time Ryan's story become main subject in Moroccan and on Wednesday morning, his news spread all over the world. At that time, the Moroccan authorities had begun digging a well to save Ryan, and a large machine such as Backhoes were used. And also, camera to track the condition of the child stuck in a well 32 meters deep, but without their efforts to save him.

From narrow of the well to the capacity of the paradise.

After 5 days of continuous excavation, Moroccan child Ryan, get off the deep well like a dead body, after he has lost his soul, in one of the news that rattle the whole word. Ryan story started in Tuesday, while he was playing near the well in village that located in shafshawn Provence in the north of the Moroccan. I had gone asr prayer, and when l came back, l didn't see Ryan, and then it papered that Ryan is in the well, Ryan's father said.

With the passage of time Ryan's story become main subject in Moroccan and on Wednesday morning, his news spread all over the world. At that time, the Moroccan government had begun digging a well to save Ryan, and a large machine such as Backhoes were used. And also, camera to track the condition of the child stuck in a well 32 meters deep, but without their efforts to save him.

Assessment

Self-Assessment

I founded that I improved in my third translation. I did some mistake but not like my old translation.

Peer-Assessment warjeen

She did well and I founded some good word in her translation.

The problems between Russia and Ukraine

In the event the war begins between Russia and Ukraine at the eastern Europe, it will be scary. And maybe die thousands of people, and immigrate hundred thousand of people. And this attack's humanity value would be valuable.

While Russia is gathering forces on Ukraine's border continuously, will Russia have a diplomatic portal to go out in this problem peacefully? What have in western hands? Could America and Europe be agreed Putin? What are talk about in the United State congress? What is Russia want? Will Russia stable the 2014 Minsk peaceful agreement? Furthermore, Russian main things are excluding NATO on its borders, and making impediment in European agreement way, and growing its trading and economic projects by putting an authority that's close Russian authority in Ukraine, moreover Russia have some other aims in Ukraine.

Until now Russia wants ruling in Belarus, Ukraine, and previous Soviet Union countries, that seen returning of Soviet Union culture, and it depends on cultural and historical factors in this land. In that time, the present Belarus, with the leadership of Alexander Lukashenko, have a Russia enmity, but in Ukraine the situation is different. After terminated Viktor Yukonite authority, who is close Russia, and after the Maidan revolution in 2014 in Ukraine, Russian political, economic, and trading concept have been weak in Ukraine.

After the revolution, an authority close to western, European union, and NATO have got the authority from Ukraine. From choosing Pietro Poroshenko time as a Ukraine president from 2014 to 2019, and after that choosing Volodymyr Zelensky as a Ukraine leadership from 2019 to now, that both presidents are close western decision place. That's at a time that Ukraine political system is semi-presidential.

The conflict between Russia and Ukraine

In the event the war starts between Russia and Ukraine at the eastern Europe, the view will be scary. And may die thousands of people, and displace hundred thousand of people. Also, this attack's humanity value would be clumsy.

While Russia is deploying its forces on Ukraine's border continuously, will Russia have a diplomatic door out in this issue peacefully? What has in western hands? Can America and Europe convince Putin? What are talked about in the United State congress? What did Russia want? Will Russia stable the 2014 Minsk peaceful agreement? Furthermore, Russian main aims are excluding NATO on its borders, and making hindrance in European Pact way, and expanding trading and economic projects by putting an authority that's close Russian command in Ukraine, moreover Russia have some other aims in Ukraine.

now Russia wants ruling in Belarus, Ukraine, and preceding Soviet Union countries, that seen as a returning of Soviet Union culture, and it depends on cultural and historical factors in this field. While, the present Belarus, Alexander Lukashenko who leads Belarus, have an enmity with Russia, in Ukraine the situation is different. After terminated Viktor Yukonite authority, who was close Russia, and after the Maidan revolution in 2014 in Ukraine, Russian political, economic, and commerce concept has weakened in Ukraine.

After the rebellion, an authority close to western, European union, and NATO have got the authority from Ukraine. From election Pietro Poroshenko time as a Ukraine president from 2014 to 2019, and later Volodymyr Zelensky elected as a Ukraine president from 2019 to now, that both presidents are close western decision place. That's at a time that Ukraine political system is semi-presidential.

Assessment

Self-assessment

First, I had mistaken but not like my first translation. I felt happy when I was translating because I'm improved. And after a classroom I change many words and also sentence in my second translation.

Peer-assessment: mawaa

In her first translation she did some mistake, but when I saw her second tr. She did well and choose good word.

Choosing words in first & second translation first second

pact	agreement
commerce	trading
land	field

Notes

-when you use in sentence "while" don't use "but" .

Turkish Energy Minister: We will continue to buy Russian oil

The Minister hinted that the world needed an additional amount of oil. The amount of oil must be imported from somewhere and the USA, Iran, Venezuela and Saudi Arabia are among those countries that can provide it.

Alp Arslan said Russia was our old and trustworthy companion and the oil Turkey imported from Russia was not easily imported from another country.

The minister also added that before Washington backed down and reimposed sanctions against Iran in 2018, Turkey imported 200,000 barrels of crude oil from Iran per day, but immediately that number of barrels was equal to zero and imports from Iran were cut off at the time. We have not been able to address other issues related to Russian oil.

"We hope that Washington and Tehran will deal as soon as possible," the minister said. In light of the fact that if treatment is performed, oil is provided on a large scale.

Assessment

Self-assessment

In my opinion I didn't do any mistakes in my translations.

Peer assessment

You should check your translations because you have some mistakes you need to correct them such grammatical and punctuation.

Assignment: How to deal with grammar?

- First find verb then subject and then translate sentence.
- translate sentence by sentence.
- arrange your sentence carefully

As far as I know, grammar is the most important thing in translation. With grammar mistake maybe the reader didn't understand the text.

Assignment: How to choose right word?

- translate word in dictionary.
- search words synonymous.
- search word phrases in google.

I strongly believe, When you set out to create a new piece of content for a global audience, check these important elements of globally-neutral content before you publish or send piece for translation. Otherwise, your message risks being misunderstood-or mistranslated.

Assignment: English valence

When I got the idea of valence I knew that I must have more control over the structure when I translates. After this activity I saw my old and last translation mistake, and I shocked how much mistake I did? This activity improves me a lot.

Some examples

_S+V+O	/ Jemima kicks the ball.
_S+V+Adj	/ He is fine.
_S+V+Adv	/ Jim is here.
_S+V.	/ She sleeps.
_S+V+N.	/ The man is a doctor.
_S+V+O+O direct	/ John gave jane a present.
_S+V+O+Adv	/ The girl is making a cake in the kitchen.
_S+V+O+Adj	/ Windows makes it easier for you to install the program.

Thank Mr. Adil for this useful system

Assignment: Modal verbs

It was a good assignment.

Can	Ability	I can speak english
Could	Request	He could go to the home
May	Permission	May come in?
Might	Probability	It might rain today
Must	Probability	It must be after 8 o'clock
Should	Advice	You shouldn't smoke
Will	Prediction	I think he will study harder

Activity: Quotes in movies

First I am shocked, and I didn't know any idea. Then I knew that when I watched movie I disintegrated focus on talk, I watch just for fun. And after this activity I will open my eyes on the talk, because my listening and language will get better.

Activity: Bermuda Triangle

Bermuda Triangle

Bermuda Triangle, is a part of Atlantic Ocean in north USA. It is said that in mysterious circumstances disappeared more than 50 ships and 20 planes in this area. The first unnatural disappearing case was on 16, September, 1950. There is no agree upon on showing the area's border over the world, and it has a mysterious triangular shape that located in Atlantic Ocean coast that has border with Florida, United State, Bermuda Island, and great Antilles Islands.

During the middle of 19th century, some ships were found abandoned without any obvious reason. It is said that there were some rescue missions disappeared when they had been flown above this area, however their wrecks weren't found.

The most famous explanation is that the lost ships sank when hit the rogue waves, which reach 100 feet high and they enough strong to destroy a ship. Bermuda Triangle located in Atlantic Ocean, where the storms come from many directions and merge to each other, these increases appearing rogue waves probability.

Bermuda Triangle

The Bermuda Triangle, is part of the Atlantic Ocean in the northern United States of America. It is said that in mysterious circumstances more than 50 ships and 20 aircraft disappeared in this area. The first case of abnormal disappearance was on 16 September 1950. There is no agreement to show the region's borders on the world, and it has a mysterious triangle shape located on the Atlantic coast that has borders with Florida, the United States, Bermuda island and the Great Antilles.

During the mid-19th century, some ships were found abandoned for no apparent reason. Some rescue missions are said to have disappeared when they were airlifted over this area, but their wreckage has not been found.

The most famous explanation is that the missing ships sank when they collided with rogue waves, which reach a height of up to 100 feet and are strong enough to destroy a ship. The Bermuda Triangle is located in the Atlantic Ocean, where storms come from many directions and merge with each other, and these increases show the likelihood of rogue waves.

At first each student translate by her/him self then at class we made a group and see other translation and we write the best. Thats good activity and usuall for us.

Activity: Professional Translation

Professional

During our visit to the United States, we were pleased to meet with Colonel “Brad Wenstrup”, a member of the Republican Party of the US Congress, Today, April 5th, 2022.

In the presence of Ms. “Bayan Sami Abdulrahman”, the representative of the Kurdistan Regional Government in the United States of America, we discussed the situation of the Kurdistan Region and the city of Duhok, and the humanitarian aids provided by the KRG to the Refugees and IDPs.

The Colonel “Wenstrup”, in turn, extended his sincere thanks to the Kurdistan Regional Government for their cooperation with the Multi-National Forces-Iraq (coalition forces) in the operation Iraqi freedom, and the war against terrorism.

Its worth noting that the Colonel "Brad Wenstrup" had participated as a doctor in the operation Iraqi freedom and the capture of Saddam Hussein and overthrew his government.

Group

We attended with the USA republic congress member Colonel Brad Wenstrup in a meeting, in Washington on Tuesday 5th April 22.

Kurdistan Region and Duhok Province Situation was talked with presence of KRG representative in USA Mrs. Bayan Sami Abdulrahman in the meeting.

Colonel Brad gratitude KRG for its cooperation with allies of Iraqi liberation movement and terrorism confrontation. The coexistence situation and humanity's services offers were emphasized in Kurdistan Region and Duhok province.

We thanks Colonel Brad Wenstrup for his effective role in Iraq liberation movement.

It's worth to say for Colonel Brad's participation in Iraqi liberation movement and Saddam Hussain's arresting operation as a doctor.

That day I didn't come to college because I was sick and couldn't come but I helped my friend .
